PROFESSIONAL SUMMARY

Business Analyst with a B.Sc. in Computer Science and minors in Statistics and Psychology, experienced in **data analysis, reporting, data modeling, visualization, and decision support**. Skilled in **SQL, Python, Power BI, Tableau, Excel, BigQuery, dbt, Streamlit, R, and Power Automate**, with a focus on turning complex data into clear, actionable insights for business and non-technical stakeholders.

EDUCATION

University of Manitoba, Winnipeg, MB
Minor: Statistics | Minor: Psychology

Bachelor of Science, Computer Science

Coursework: Data Science Tools, Applied Linear Models, Statistical Computing, Principles of Data Collection, Basic & Intermediate Statistics, Databases, Data Structures & Algorithms, Bioinformatics, Software Engineering, Analysis of Algorithms

SKILLS

Analysis & Visualization	Microsoft Excel, Power BI, Tableau, Python, R, SPSS, EDA, KPI Reporting
Programming & Querying	SQL, Python, R, Pandas, NumPy, DAX, Power Query, BigQuery
Data Engineering Reporting & Collaboration	dbt Core, Data Modeling, Star Schema, ETL/ELT, Data Quality, Data Transformation Microsoft 365, PowerPoint, Word, GitHub, Stakeholder Communication, Documentation
Automation & Apps	Power Automate, Streamlit, Git, GitHub Actions, Dashboard Development
Statistics & Methods	Hypothesis Testing, Regression, ANOVA, Correlation, Clustering, RFM Segmentation

PROJECTS

PayFlow Analytics – Fintech Payment Analytics

BigQuery, SQL, Power BI, Python, RFM

- Analyzed **417K payment transactions, 5,000 customers, 6,800 support tickets, and 3,100 disputes**; built a **BigQuery star schema** and RFM-based customer health framework to evaluate payment failures, customer risk, and business performance.
- Developed a **4-page Power BI dashboard** covering executive KPIs, payment performance, customer health, support operations, and risk indicators using documented SQL and dimensional data models.

Google Analytics 4 Ecommerce Analytics

BigQuery, dbt Core, Power BI, Vanna AI, SQL

- Built an end-to-end analytics workflow from raw GA4 events to **dbt staging, intermediate, and business-ready marts**, using BEAM/7Ws principles and a dimensional star schema for acquisition, funnel, and product analysis.
- Created **Power BI dashboards** and a Vanna AI conversational analytics layer that uses documented schema and SQL examples for natural-language-to-SQL business analysis.

Bank Branch Expansion Simulator

Python, Pandas, NumPy, Streamlit, Tableau, FDIC

- Analyzed **85,000+ annual FDIC branch records**, cleaned and validated geographic/deposit data, developed opportunity scores, and built a constrained optimization workflow using budget, distance, and deposit-capture requirements.
- Created **Streamlit and Tableau decision-support views** with scenario comparisons, interactive maps, KPIs, and branch-plan outputs to translate analytics into business recommendations.

Motor Vehicle Insurance – Exploratory Data Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed EDA on approximately **105,000 insurance policy records**, assessing missing values, distributions, outliers, categorical variables, correlations, premiums, claims, vehicle age, fuel type, and vehicle power to identify business-oriented patterns.

Statistical Analysis Project

SPSS, Hypothesis Testing, ANOVA, Chi-Square, Statistics

- Applied **one-sample, dependent and independent t-tests, one-way/factorial ANOVA, chi-square, and Mann-Whitney U tests**; interpreted p-values, confidence intervals, statistical significance, and SPSS outputs to communicate research findings.
